November Meeting Details
System Security, It's Not About Compliance Anymore

This presentation will discuss relying on compliance to cyber security requirements may not ensure the protection of computing resources and the data which is stored on those systems. It is more about understanding what is at risk and the measures needed to protect our infrastructure from that risk, while at the same time satisfying compliance. Topics to be discussed are:

- Threats – What are you helping to protect against?

- Risk – Is there?

- Mitigation – Does being in Compliance Help?

- Strategies – Some thoughts for the future.

Date: November 11, 2010

Time: 11:30 AM Registration | 12:00 - 1:00 PM Lunch | 1:00 - 3:00 PM Program

Location: Lidia's | 101 West 22nd Street | Kansas City | Missouri | 64108

Price: $35 members | $50 guests | $5 students

CPE: 2 Credits

Menu: Caesar Salad, Pasta Trio, Assorted Cookies, Coffee & Tea

Speaker: Brian Findley, Honeywell Federal Manufacturing and Technologies

Brian Findley is currently the Counterintelligence Cyber Technical Expert for NNSA's Kansas City Plant (KCP) operated by Honeywell Federal Manufacturing & Technologies. He has spent the past 13 years working in the area of Cyber Security and Cyber Counterintelligence. Brian specializes in analyzing adversaries whose intent is to compromise computing resources and steal data or even worse, commit espionage. He has led penetration test teams and managed several projects resulting in improvements to network/host security and design, IT strategy, business continuity, and IT risk identification. Brian is a member of the High Technology Crime and Investigation Association's Kansas City Chapter and Infragard's Kansas City Chapter. Brian received his BA in Management and Human Relations from MidAmerica Nazarene University and is a Certified Information System Security Professional (CISSP).

Topic	Date	CPE
COBIT Foundation Course	1/24/2011—1/25/2011	16
Implementing IT Governance Using COBIT & Val IT	1/26/2011—1/27/2011	16

The Certified Information Systems Auditor (CISA) is ISACA's cornerstone certification. The CISA certification has been earned by more than 60,000 professionals since inception and is for the IS audit, control, assurance and/or security professionals who wish to set themselves apart from their peers. Since 1978, the CISA certification has been renowned as the globally recognized achievement for those who control, monitor and assess an organization's information technology and business

The Certified Information Security Manager (CISM) certification is a unique management focused certification that has been earned by over 9,000 professionals since its introduction in 2003. Unlike other security certifications, CISM is for the individual who manages, designs, oversees and assesses an enterprise's information security program. CISM defines the core competencies and international performance standards that those who have information security management responsibilities must master.

The IT Governance certification is intended to recognize a wide range of professionals for their knowledge and application of IT governance principles and practices. More than 200 CGEIT certificates have been awarded. It is designed for professionals who have management, advisory, or assurance responsibilities as defined by a "job practice" consisting of IT governance related tasks and knowledge. Earning this designation will enable professionals to respond to the growing business demand for a comprehensive IT governance program that defines responsibility and accountability across the entire enter-

CRISC Update

The Certified in Risk and Information Systems Control™ (CRISC™, pronounced "see-risk") grandfathering program continues. ISACA has certified the 1,000th CRISC Professional four months into its grandfathering program. The CRISC grandfathering program will remain open through 31 March 2011. After the grandfathering period has closed, candidates will be required to pass the CRISC exam in addition to fulfilling other requirements to attain the designation. The first CRISC exam will be administered in June 2011.

For more information on this and the certification in general, please visit *www.isaca.org/*
