Registration: www.isaca-kc.org by Monday, January 7th.

Presentation Overview:

This is a discussion that will explore information security program maturity models. This session will cover the benefits of these models and how they are leveraged by CISOs. The session will take a closer look into one information security program maturity model and describe its model approach, structure, maturity categories, voting process, and executive dashboard reporting, along with providing a few comparisons of this model with other information security program maturity models available in the market today.

Speaker:

As the Vice President of Strategic Services at Fishnet Security, Mark Carney leads a group of 22 seasoned security advisors that interface with CSOs, CROs, and CIOs at FORTUNE 500 and global institutions that assist these organizations with information assurance, managed services, identity and access management, and training professional service’s needs. Mark has experience in building information assurance professional services organizations, including all aspects of sales/marketing/business development, staff management, project management, and service delivery execution. In his over 10 years at FishNet Security, he has also managed the information assurance division and spent several years as a Sr. Security Consultant.

The information presented and included in accompanying materials (if any) is of a general nature and is not intended to address the circumstances of any particular individual or entity. Although the speaker and content authors endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. No one should act upon such information without appropriate professional advice after a thorough examination of the particular situation.
First 2013 Training: Information Security Essentials for IT Auditors (Miami, Florida)

ISACA is partnering with Deloitte to offer its first Training Weeks event for 2013. Spend four informative days from February 4th to the 7th learning how to best use information security frameworks, common architectures and security models as well as how virtualization and remote access impact security risks. For more information or to register, visit http://bit.ly/R94Dpf.

Welcome to the Kansas City Chapter of ISACA!

5 Reasons to Join ISACA on Social Media

Did you know that ISACA is active on a number of social media platforms? In ISACA’s social media groups, chapter members can:

♦ Get in-depth information on hot topics in the ISACA Now blog
♦ Discover association offerings with the ISACA YouTube channel
♦ Pose questions to COBIT 5 experts on Linked In
♦ Learn about their peers with profiles posted on Facebook
♦ Celebrate exam successes or new certifications
How Did ISACA Benefit You in 2012?

As 2012 is coming to a close, members are sharing how their ISACA membership has benefited them throughout the year. Here are some great examples:

- “The ISACA community has helped me understand information security in a better way,” says member Rahul Das.
- Victor Joshua Penumaka says, “ISACA helps me network with people that are highly passionate and motivated about their career. Thanks ISACA.”
- “ISACA has benefited me by offering relevant opportunities for keeping up with what peers in the profession are thinking and doing worldwide—by offering great networking opportunities for IT governance professionals and the opportunity to contribute something back to the profession,” wrote Vittal R. Raj.

Has ISACA helped you in your career? Got a great story to share? Take a moment for reflection and share your favorite benefits on:

Registration Now Open for June Exams

Interested in getting certified but missed the December exams? Exams are held twice a year and registration is now open for the June exam dates. Save $50 by registering before February 13th! To register or to find out more, visit http://www.isaca.org/Certification/Pages/Exam-Registration.aspx.

Subject Matter Expert (SME) Reviewers and Developers Needed

ISACA is currently seeking help in the following current projects

- **Audit/Assurance Programs** - always need SMEs interested in reviewing audit programs throughout the year
- **Big Data White Paper** - need developers and reviewers (development is now, review in early January 2013)
- **COBIT 5 for Assurance** – SME reviewers needed (review will take place Quarter 1, 2013)
- **COBIT 5 for Risk** - SME reviewers needed (review will take place in Quarter1 / Quarter 2 2013)
- **Cybersecurity Using COBIT 5 for Information Security** – SME reviewers needed in early Quarter 2, 2013
- **Vendor Management Book** – SME reviewers needed Quarter 2, 2013

Details on these projects can be found by visiting http://www.isaca.org/Knowledge-Center/Research/Pages/Current-Projects.aspx. If you know of someone in your chapter suitable for any of the above projects, or if you yourself are interested, please contact Shannon Donahue at research@isaca.org.
